

# NOVEL QUATERNARY AMMONIUM COMPOUNDS

# DESCRIPTION OF RELATED APPLICATIONS

This application claims priority to Japanese Patent Application

No. 2002-248586 filed on August 28, 2002, Japanese Patent Application

No. 2002-364725 filed on December 17, 2002, U.S. Provisional

Application Serial No. 60/407291 filed September 3, 2002, and U.S.

Provisional Application Serial No. 60/434416 filed December 19, 2002

under the provisions of 35 U.S.C. 119 and 35 U.S.C. 120. The

contents of these applications are incorporated herein by reference.

## BACKGROUND OF THE INVENTION

#### 1) Field of the Invention

The present invention relates to novel benzothiazepine compounds having a thioamide bond and a quaternary ammonium substituent and to pharmaceutical compositions which contain them.

Moreover, the present invention relates to pharmaceutical compositions for the treatment of cholestasis-caused hepatopathy and the like.

### 20 2) Description of the Related Art

Hyperlipidemia means a state where neutral fat, cholesterol and the like in blood are at higher levels than the normal levels and has been known to deserve a treatment since it is a main risk factor in ischemic diseases. Moreover, hyperlipidemia is also known to cause arteriosclerosis and in particular, to decrease blood cholesterol level is
